https://github.com/anasbinnoushad

Detail-oriented and highly motivated Computer Science Engineering graduate with a strong foundation in full-stack web development. Proficient in designing responsive user interfaces, writing clean and scalable code, and building efficient server-side applications. Proven ability to architect dynamic web apps with seamless data persistence and optimized performance. Eager to contribute technical skills and a collaborative mindset to a dynamic development team.

PROJECTS & EXPERIENCE

Full-Stack Django Developer (Live Client Project))
Kalaav Studio — https://kalaav.com
September 27th 2026 - October 6th 2026

- Architected and deployed "Kalaav Studio," a live full-stack web application hosted on Render with custom SSL domain integration (kalaav.com).
- Engineered a secure, custom administrative dashboard for client content management, featuring dynamic portfolio uploading, work categorization, and gallery administration.
- Implemented automated email notification workflows and password recovery systems linked with authorized admin email accounts.
- Designed a fully responsive, mobile-first user interface featuring smooth scroll animations, lightbox media preview drawers, and direct WhatsApp Business API integration.

Full-Stack Python Developer (Personal Project)
Independent Developer
August 2026 - September 2026

- **Developing** "Friday," a hands-free, full-stack personal assistant application utilizing the Django framework, featuring voice listening, smart command routing via regular expressions, and bilingual support (English/Malayalam).
- **Designing** a unified user dashboard by integrating a modern CSS layout directly into Django templates.
- **Currently merged** the sidebar, chat window, and recent logs into a single, cohesive user interface to improve user experience.

Engineering Capstone Project
St Thomas Institute of Science and Technology
Mangattukonam,Tvm
September 2022 – May 2026

- **Co-developed** "Lawvia AI," an award-winning legal platform designed to bridge the gap between everyday citizens and India's legal system.
- **Collaborated** in a team environment where the application leveraged NLP models, automated internal routing, and integrated mapping APIs.
- **Contributed to** system testing, project documentation, and finalizing the project presentation, leading to the project winning 1st position and an international journal publication.

EDUCATION & CERTIFICATE

Internship(Kompetenzen Technologies OPC Pvt. Ltd.)
Trivandrum, Kerala
Python Full-Stack Development
June 2025 - July 2026

Kerala Technical University
Trivandrum, Kerala
B.Tech in Computer Science and Engineering
Graduation: 2026

School
Janatha Higher Secondary - 12th

SKILLS

- **Languages:** Python, SQL, HTML, CSS
- **Frameworks**: Django
- **Tools:** Postman, Git/GitHub
- **Databases:** MySQL
